- People with general health such as high blood pressure, cardiovascular conditions, diabetes, asthma, lung disease, hyperthyroidism, liver or kidney problems, stomach or intestinal ulcers or tumours of the adrenal glands
- People who have a sensitivity/allergy to nicotine or any of the other e-liquid ingredients.

Possible adverse effects

Immediately stop use of this product and seek medical advice if you experience any of the following:

- Feeling faint
- Nausea or vomiting
- Headache
- Dizziness
- Stomach discomfort
- Coughing or irritation to the mouth/throat
- Nasal congestion
- Chest palpitations/development of an irregular heartbeat
- Allergic reaction such as rash, itching or swelling
- Any other unusual or adverse effect.

If medical advice is needed, have product container and label to hand.

Caution

Do not swallow any e-liquid substances.

Nicotine is a toxic substance when inhaled, ingested or in contact with skin. It contact with skin is made, wash immediately.

Nicotine warning applies when the product is used as designed and fitted with nicotine-containing e-liquid.

Keep out of reach of children.

Please dispose of this product responsibly by following your local authority electronic waste disposal guidelines. Using with incompatible parts, e-liquids and accessories may cause overheating and/or injury.

Looking after your device

Store in a cool, dry place.

Do not leave, charge or store the device in damp environments, in direct sunlight or in extreme temperatures. Never submerge any of the kit in water or any other liquid.

Do not use the device when temperatures are outside the range -10°C to 50°C.

Do not attempt to repair the product yourself as damage or personal injury may occur.

Do not use this product or its parts for any purpose other than vaping.

Do not use parts that are damaged or cracked.

Do not use with incompatible parts, e-liquids or accessories; this can affect product performance and safety.

Avoid carrying in pockets or bags with other metal objects such as keys and coins.

Do not place the battery near flammable items such as carpets, curtains, etc., whilst charging.

Do not leave device on charge overnight or unattended whilst charging.

If the device becomes hot or emits a strange smell during charging, remove it from charge immediately and do not attempt to use it again.

Some useful tips

Ready for use with high vg e-liquids. Each time you replace the coil, you should vape a few times to ensure the coil is conditioned and the e-liquid flavour comes through.

Also compatible with same coil of different resistances for either sub ohm or mouth to lung vaping, ideal for new users or experienced vapers.

Specifications

**MOD**

- 1600mAh Li-ion
- 10W, 20W, 30W 0.3MΩ
- 22.3mm

**TANK**

- 2.0ml (Max)
- Ø18.5x56.0mm
- 0.7Ω Kanthal coil

How to use your kit

**Power On/Off**

Press fire button 5 times in 2 seconds.

**Vaping**

Open the airflow controller, adjusting to your preference.

Press and hold the fire button to vape.

Close the airflow controller and press the fire button 5 times in 2 seconds when not vaping.

Close the airflow controller when not in use.

To select the next wattage setting:

Press the button underneath the fire button once to change the wattage between low, medium and high setting.

Charging the kit

The device will flash red when it needs to be charged. The battery will last for 30 minutes (max) before it is fully switched off. Remove the device from the charger cable to use your vape kit.

- When the LED glows blue with “H” underneath, after releasing the fire button, the battery has between 70-100% charge.
- When the LED glows green with “M” underneath, after releasing the fire button, the battery has between 30-70% charge.
- When the LED glows red with “L” underneath, after releasing the fire button, the battery has between 0-30% charge.

How to change the coil

1. Remove the top cap from the tank by rotating it anticlockwise.
2. Remove the used coil by rotating it anticlockwise and replace with a new coil.
3. Screw the tank back onto the mod securely enough to avoid e-liquid leaks.

The coils should be changed regularly in line with frequency of use or if you notice a deterioration in taste/quality of the vapour from your device. The coil is designed for use with high vg e-liquids.

How to fill with e-liquid

1. Remove the top cap from the tank by rotating it anticlockwise.
2. Carefully pour e-liquid into the side hole and ensure the tank is almost full.
3. Close the top cap by rotating it clockwise.
